PRAJWAL M M

Bengaluru, India | +91 9901155311 | prajwalmm2008@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Motivated MCA student specializing in Storage and Cloud Technology with hands-on experience in AWS cloud solutions, serverless applications, Infrastructure as Code, and CI/CD automation. Familiar with Docker, Docker Compose, Jenkins, Linux fundamentals, and containerization concepts. Strong interest in DevOps, cloud infrastructure, deployment automation, monitoring, and troubleshooting. Eager to contribute to building reliable, scalable, and secure cloud-native applications.

EDUCATION

Master of Computer Applications (MCA) — Pursuing **2025 – 2027**
JAIN (Deemed-to-be University), Bengaluru
Specialization: Storage, Cloud and Technology

Bachelor of Computer Applications (BCA) **2022 – 2025**
JAIN (Deemed-to-be University), Bengaluru

TECHNICAL SKILLS

Programming Languages: Python
Cloud Platform: AWS (EC2, S3, IAM, Lambda, API Gateway, Load Balancer, CloudFront, CloudWatch, VPC, SQS, SNS, Cognito)
DevOps & CI/CD: Git, GitHub, GitHub Actions, Jenkins (Foundational), CI/CD Pipelines
Containers & Orchestration: Docker, Docker Compose, Kubernetes (Basic)
Infrastructure as Code (IaC): Terraform, AWS CDK
Web Technologies: React, Tailwind CSS
Database: SQL, Firebase
Core Concepts: Data Structures & Algorithms, Cloud Computing

EXPERIENCE

CodeTech — AWS Cloud Intern **2026**

- Built and deployed AWS projects involving serverless data pipelines, Lambda-based image processing, CI/CD automation, and Infrastructure as Code using AWS CDK.
- Worked with AWS Lambda, S3, API Gateway, DynamoDB, IAM, CloudFront, and CDK to design and deploy cloud-based solutions.
- Gained practical experience in serverless computing, cloud infrastructure, automation, and CI/CD.

PROJECTS

Unbiased AI — Bias Detection & Mitigation Platform
Next.js, React, Tailwind CSS, Firebase

- Built a full-stack platform for detecting, analyzing, and mitigating bias in datasets
- Implemented automated sensitive-attribute detection and fairness scoring across demographic groups
- Developed a bias mitigation engine to reduce disparities and improve dataset fairness
- Integrated AI-powered insights, automated report generation, and processed dataset export

CloudCart — Serverless E-Commerce Platform
AWS (S3, CloudFront, API Gateway HTTP API, Lambda, DynamoDB, Cognito, IAM, CloudWatch), GitHub Actions, HTML, CSS, JavaScript

- Developed a serverless e-commerce platform with a responsive frontend supporting product browsing, search, cart functionality, authentication, and role-based admin management
- Built backend HTTP API endpoints using Amazon API Gateway HTTP API and AWS Lambda, integrating DynamoDB for product and inventory management
- Implemented secure user authentication and role-based admin access using Amazon Cognito
- Deployed the frontend using Amazon S3 and CloudFront for scalable content delivery and HTTPS access
- Built a secure CI/CD pipeline using GitHub Actions and AWS OIDC to automatically deploy frontend changes to S3 and invalidate the CloudFront cache without storing long-lived AWS credentials
- Configured IAM roles and CloudWatch logging/monitoring for secure AWS access, troubleshooting, and application observability

CERTIFICATIONS

- AWS Architecture - AWS Academy
- Microservices and CI/CD Pipeline Builder - AWS Academy
